

UNV - Share the Story (Albania)

The UN Joint Programme Empowering the Vulnerable Communities (EVC) of Albania supported the social integration of the most marginalized members of the Roma and Egyptian community.

An essential part of the programme's success was the role played by UNV.. Working as Roma Exchange Workers, the United Nations Volunteers empowered the other community members to become actively engaged in their own development challenge. Establishing Community Based Organization to help prioritize the Communities' needs, the programme enabled community members to access their rights, particularly in the access to public services through civil registration, the realization of local infrastructure projects & the facilitation of vocational training.

Sustainable Development Goal:
