Notes:

- 1) As of January 2019, UNV is offering companies a corporate online volunteering solution as a means to capture their contribution to the Sustainable Development Goals through corporate volunteering. Companies receive a dedicated, co-branded website for their employees, as well as comprehensive reports on the online volunteering activities of their employees.
- 2) The total net price per year is charged annually.
- 3) UN offers an incentive for longer-term commitment, as the higher costs at the beginning and at the end of a partnership are distributed over a longer time period.
