	5 years	375,000	20	60,000

*The classification of countries is based on World Bank data (<https://datahelpdesk.worldbank.org/>)

Notes:

- 1) As of January 2019, UNV is offering countries the opportunity to obtain a dedicated volunteer management platform to manage volunteer programmes at national or sub-national level. These country platforms will be managed by the partner and are built on UNV's online volunteering technology and made available using a "Software as a Service" (SaaS) approach.
- 2) The total net price per year is charged annually.
- 3) UNV offers an incentive for longer-term commitment, as the higher costs at the beginning and at the end of a partnership are distributed over a longer time period.
