Honduras is a tropical country in the middle of Central America, bordered to the north with to Caribbean Sea, to the south with El Salvador, to the west with Guatemala and to the East with Nicaragua. Climate varies significantly depending on altitude. Mid-altitude temperatures are fairly moderate with regular sunshine making temperatures climb from 15-20°C (59-68°F) to up around 28°C (low 82°F) during the middle of the day. Rainfall is quite low to moderate with a patchy wet season from May to October. Lowland and coastal regions experience less of a temperature range with warmer nights and slightly less rainfall.

The threat against UN system staff members from political activity is considered low. The threat from...
common criminal elements is considered highly critical in certain areas of the country. Violent crime is a serious and growing problem, especially in certain zones of Tegucigalpa and San Pedro Sula, and to a less degree throughout the country. Pickpockets and purse-snatchers are prevalent in major cities at tourist sites, especially in parts of Comayagua and the central market surroundings of Tegucigalpa. Visits to these areas should be avoided, especially after dark. Highway, road and street robberies, carjacking and assaults of pedestrians by armed thieves are still high. Roadblocks and demonstrations on the main highways and border countries customs offices have decreased. In the past, demonstrations have ended in street violence, requiring intervention by national police for which precaution is requested. Threats against the public transportation system by gangs have been reported in San Pedro Sula, supposedly related to Organized Crime, for which caution should be maintained at all times on the street.

Visitors are specially advised to protect against mosquitoes bites in affected areas, due to insect – borne diseases such as Malaria and Dengue Fever (both serious, potentially fatal diseases). In general mosquitoes in Honduras are most bothersome from dusk to dawn, especially in the countryside. Other infectious diseases are common such as Diarrhea, Amoebic and food. Some specific health cares must be considered especially hygienic practices avoid eating in places where cleaning is not ensured and pay special attention to the hygiene of fruits and vegetables, wash fruits and vegetables carefully if you eat them raw or peel them before eating.
